Executive Summary

Full Stack Software Developer with a Distinction Diploma in Full Stack Software Development, with a focus on Python and backend development. Experience building and deploying full stack applications using Python, FastAPI, Django, REST APIs, React, TypeScript, JavaScript, SQL and PostgreSQL, with practical experience in AWS EC2, Docker, Docker Compose, Linux, Nginx, Git/GitHub and GitHub Actions. Two years of professional experience in fund administration, with strong analytical, problem solving, data management and stakeholder communication skills developed in a fast paced financial services environment.

Technical Skills

Languages:	Python, TypeScript, JavaScript, SQL, HTML5, CSS3
Backend & APIs:	FastAPI, Django, REST APIs, SQLAlchemy, Alembic
Frontend:	React, Vite, Bootstrap
Databases:	PostgreSQL, MySQL
Testing:	pytest, Vitest, React Testing Library, Software Testing
Cloud & Deployment:	AWS EC2, Docker, Docker Compose, Linux, Nginx, Heroku
Data & ML:	Streamlit, Predictive Analytics, Data Analysis, Data Visualisation
Development Tools:	Git, GitHub, GitHub Actions, VS Code, Jupyter Notebook
Libraries:	Pandas, NumPy, Scikit-learn, Plotly, Matplotlib, jQuery

Education

May 2025 – May 2026	Distinction Diploma in Full Stack Software Development Code Institute - Dublin, Ireland
Sep 2017 – May 2021	Bachelor of Business (Honours), Business & Marketing Munster Technological University - Tralee, Ireland
Nov 2022 – Mar 2023	Spanish Language Studies (B1 Level) Instituto Hispánico de Murcia - Murcia, Spain

Technical Projects

- **SiteForecaster** | [GitHub](#) | [Live Demo](#) - Full-stack planning intelligence platform helping electrical contractors find and prioritise local construction opportunities from Irish planning data. Built a FastAPI/REST backend with PostgreSQL/SQLAlchemy, opportunity scoring and electrical work logic, and a React/TypeScript frontend. Added automated backend/frontend tests and deployed to AWS EC2 on Ubuntu with Nginx.
Tech: Python, FastAPI, PostgreSQL, SQLAlchemy, Alembic, React, TypeScript, Docker, Docker Compose, pytest, Vitest, GitHub Actions, AWS EC2, Nginx.
- **Hotel Booking Predictive Analytics** | [GitHub](#) | [Live Demo](#) - Machine learning app predicting hotel booking cancellations using exploratory data analysis, preprocessing and model comparison, with an interactive Streamlit dashboard. Selected Gradient Boosting as the final model, achieving a test ROC-AUC of 0.808.
Tech: Python, Streamlit, Scikit-learn, Pandas, NumPy, Plotly, Matplotlib, Heroku.

- **Precision Performance PT** | [GitHub](#) | [Live Demo](#) - Full stack personal training management platform using Django and PostgreSQL, featuring role based authentication and access control for clients, trainers and owners. Developed client and trainer dashboards, workout programme management, progress tracking and support messaging.
Tech: Python, Django, PostgreSQL, JavaScript, HTML5, CSS3, Bootstrap 5, Heroku.

Work Experience

February 2024 – January 2026

Investor Services Administrator – HedgeServ (Dublin, Ireland)

- Worked within a five-person team servicing nine investment fund clients and their investors in a fast-paced financial services environment.
- Processed subscriptions, redemptions and transfers while maintaining accurate investor records and adhering to internal procedures and compliance requirements.
- Prepared monthly and quarterly reports and used Microsoft Excel and internal systems to analyse, maintain and reconcile investor and fund data.
- Managed investor and client queries, collaborating across departments to resolve issues, meet deadlines and maintain a high standard of service.

January 2026 – Present

Caddy / Pro Shop Assistant (Tralee Golf Club)

- Delivered high-quality customer service to members and international visitors, including high-net-worth clients from diverse backgrounds.
- Developed strong communication, interpersonal and situational awareness skills by anticipating client needs and adapting to different personalities and expectations.

Additional Training

- Supervised Machine Learning: Regression and Classification (DeepLearning.AI) – Coursera
- Python for Data Science, AI & Development (IBM) – Coursera

Professional Development & Community

- Engage with the wider software development community through Python Ireland and AI Ireland networking events and technical talks.
- Continue to develop new software projects and expand my portfolio.
